

NISSAN  INTELLIGENT MOBILITY™

Nissan Intelligent Mobility guides everything we do. We're using new technologies to transform cars from mere driving machines into partners. Together the journey is more confident, connected, and exciting. Whether it's cars that share the task of driving with you, or highways that charge your EV as you go along, it's all in the very near future. And it's a future already taking shape in the Nissan you drive today.

REMOTE START FROM YOUR PHONE

With NissanConnect Services, you can remotely start your vehicle from nearly anywhere your smartphone works. Need to unlock your vehicle for a friend? Just tap the unlock button on your phone. You can even find your parked vehicle’s location. Now that’s technology built for you.^{6,8,9}

A MORE CONFIDENT, EXCITING, AND CONNECTED RIDE

Nissan Intelligent Mobility is changing how you move forever. You'll drive with greater awareness and can even get an assist when you need it. This is the future of driving, and it's here for everyone right now.¹

NISSAN INTELLIGENT MOBILITY™

GET A HAND WHEN YOU NEED IT

Intelligent Lane Intervention

Maxima® helps keep you in your lane. When lane markings are clear, Intelligent Lane Intervention can detect if you're straying out of your lane and can tap the brakes to help gently guide you back.^{6,11}

Intelligent Cruise Control

Watches the flow of traffic to take the tedium out of your daily commute. The system helps maintain an adjustable speed and set distance between you and the car ahead.¹²

Intelligent Emergency Braking with Pedestrian Detection

Monitors your speed and distance between you and the car ahead, and can let you know if you need to slow down. It can also automatically engage the brakes to help avoid a frontal collision or lessen the severity of an impact. And when it detects a pedestrian in the crosswalk, it can stop you in your tracks.¹⁶

Rear Intelligent Emergency Braking

Save your bumper. Maxima with Rear Intelligent Emergency Braking watches out directly behind you for stationary items you might not see. If it detects something and you fail to stop, it can automatically engage the brakes to help avoid a rear collision or lessen the severity of an impact.¹⁷

SEE AND SENSE MORE AROUND YOU

Intelligent Forward Collision Warning

Maxima is on the lookout when you can't see what's going on up there. Intelligent Forward Collision Warning watches up to two cars ahead, and when it detects sudden deceleration in front of you, it gives you a warning to slow down.¹³

Blind Spot Warning

Change lanes with confidence. This feature keeps an eye on the blind spot area and gives you a heads-up if it detects a vehicle hiding there.¹⁴

Rear Cross Traffic Alert

Fear no parking lot. When you're backing out of a space, Rear Cross Traffic Alert watches around the rear of your Maxima and can warn you about cars it detects creeping up on you from either side.¹⁵

Intelligent Around View® Monitor

Four cameras make parking easy with a virtual composite 360° bird's-eye view of your Maxima. You can select from split-screen close-ups of the front, rear, and curbside views for a better look. It also gives you an on-screen heads-up when it detects moving objects near your vehicle.^{6,18,19}

Lane Departure Warning

Lane Departure Warning helps make sure you change lanes only when you mean to. If the system detects that you're drifting over, it'll warn you.¹¹

Nissan's environmental action plan focuses on several key areas. In addition to increasing production of Zero Emission vehicles like the 100% electric LEAF,® we're improving fuel efficiency across our lineup, and reducing the environmental impact of manufacturing through energy-efficient practices in our plants.
